

REPLACEMENT PROP SELECTION CHART

Minn Kota offers a wide range of replacement props to fit all existing and many discontinued models. The props include the nut attachment and can be installed in seconds.

Weedless Wedge 2

The next generation of the industry's only 100% fully weedless prop. Swept-back, flared blades "wedge" weeds away, allowing you to pass through heavy vegetation at any speed, without draining valuable battery power.

Exclusive Weedless Wedge Props

The patented Weedless Wedge is the only 100% weedless prop in the history of fishing. And it delivers full power so there's no need to carry an extra prop and a wrench. The design behind the Weedless Wedge is both simple and brilliant. The leading edge on each propeller blade is shaped with a swept-back edge that always meets at an angle of less than 45 degrees. "Wedges" weeds away from the hub—even at slow fishing speeds...even through a jungle.

SHAFT LENGTH SELECTION GUIDE

Measure down from the mounting surface of the transom or bow to the water level*. Use this measurement and the tables below to find the appropriate shaft length.

TRANSOM GUIDE

Transom to Waterline	Recommended Shaft Length
0" to 10"	30"
10" to 16"	36"
16" to 22"	42"
Over 22"	Consult Factory

BOW GUIDE

Bow to Waterline	Recommended Shaft Length
0" to 16"	36"
16" to 22"	42"
22" to 28"	48" to 52"
28" to 34"	54" to 62"

ENGINE MOUNTED GUIDE

- Cavitation Plate to Waterline 13" (minimum)
- Optional operating mode is with engine trimmed all the way down

* Add 5" to waterline measurement for fishing in rough water. Add 12" to waterline measurement for steering a hand control motor while standing.
